Let me introduce myself. My name is Chul-soo Kim and my English name is Steve. I was born on February 23<sup>rd</sup>, 1985, so I am in my late 20s. Now, I'm working as a Marketing specialist in ABC Company. To work as part of a team, I need to have good people skills and good communication skills. When I first started working, I didn't have that ability, but now that I've worked at this company for a few years, I've developed these skills. At my company, I have to work on many marketing projects and do a lot of research on consumer behavior, so my team and I have to work long hours. This is sometimes stressful, but I enjoy my job because I can apply what I learned from my school as a Business major. My life's motto is, "Work hard and play hard," so I like to hang out with my friends and family on the weekend. I like to go out to bars and clubs on the weekend to meet new people. Also, I like to find some delicious hole-in-the-wall restaurants. As for my family, I am the only child so I grew up with the full love from my parents. But my parents didn't want me to grow up as a spoiled child so they always taught me about humility, forgiveness, and compassion. I feel blessed growing up in such a loving family and I hope I could do the same for my family in the future.

## Vocabulary

1. come up with : ~을 생산하다.
2. projection : 계획
3. consumer behavior : 소비자 행동
4. get in trouble : 혼나다.

## Sample Answer

Since I am in the Marketing Department, our team has many projects to prepare for. Last month, we had to research consumer behavior for our main product and we had to develop a business plan to increase profits for the next business quarter. I had to work with our team and the R&D department to come up with the projections. Because most of my job is research and making marketing plans, it was not hard to research consumer behavior, but it was difficult because I had to work with the R&D department. We had some difficulties agreeing on the business plan. We didn't understand each other's points of views. In the beginning, we were upset at each other and didn't communicate with each other when we made changes. When the Human Resources department saw that we were not cooperating with each other, they told our superiors. We got in trouble with our boss, so later I came up with an idea to incorporate the best parts of both teams' plans. Finally, our boss accepted this and both teams were satisfied.
